AFTER 2 SESSIONS

"The brown spots on my face have been driving me crazy for years. Every day I would spend nearly an hour trying to cover them with expensive makeup. After 3 treatments with Ultra, the spots have nearly disappeared! The amount of time I got back in addition to the money I'm saving on makeup is substantial and I couldn't be happier with the results!"

PATIENT J.C.

RESULTS MAY VARY

Is there any downtime?

You will experience mild redness following your Lutronic Ultra™ treatment and you will be able to resume normal activities immediately. Makeup may be applied based upon direction from your treatment provider. In most cases, full healing may take 5 to 7 days.

How does it feel?

Discomfort during Ultra treatments is variable. Most patients describe the sensation as "mild to moderate" discomfort and can tolerate the treatment without any topical anesthetic. Your provider may elect to apply a topical numbing cream to minimize discomfort.

How long does the treatment take?

Treatments range from 5 to 20 minutes depending upon the area being treated. Some Ultra treatments are so quick that patients refer to it as a Lunchtime Facial!

How many treatments will I need?

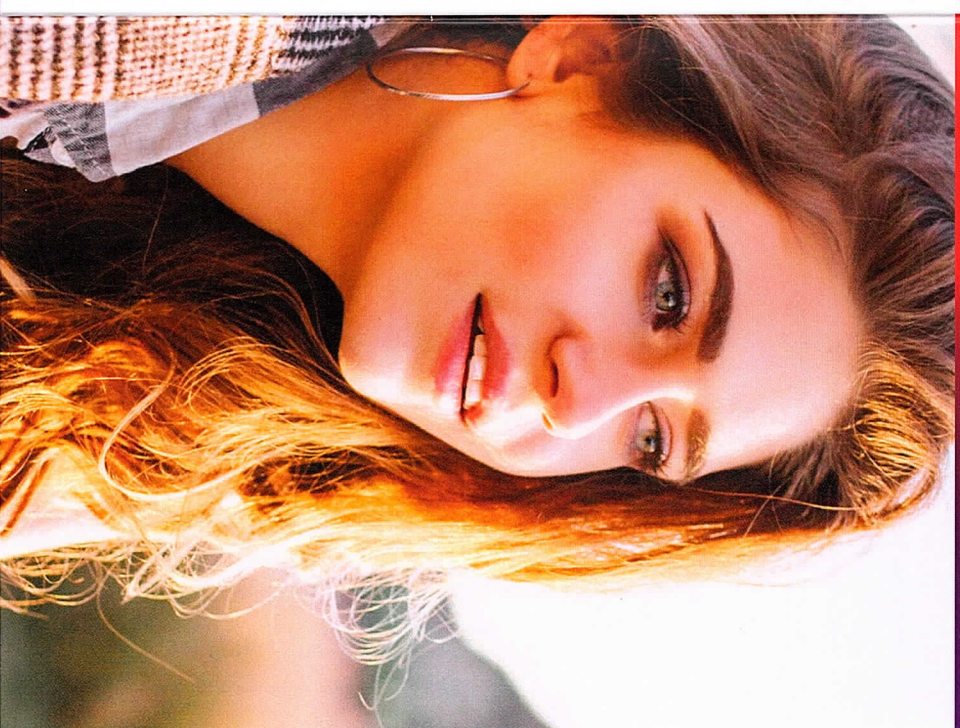

Depending upon your expectations, you may see results after a single treatment while other skin conditions could require several visits. Discuss your expectations with your provider.

Is Ultra safe for all skin types?

Yes! Anyone can benefit from Ultra's cutting-edge technology.
